PROGRAM HEALTH SUMMARY™

A downloadable and printable summary that encompasses each participant's health score, opportunities and Personal Health Summary™, which can be shared with their primary care provider.

OPPORTUNITIES MANAGEMENT

Allows employers to structure rewards or incentives for employees for participating in or achieving health goals. Employers may use recommended standards or tailor the opportunities to best encourage the desired outcomes of their health management initiative.

ONECOMMUNITY PROGRAM MANAGEMENT

A robust management application gives designated Program Managers in-depth reporting and management capabilities for OneCommunity. It provides oversight for scheduling and biometrics, management of participation and opportunities, and includes aggregate reporting such as the Workforce Health Profile™ and HRInsight™ financial analysis.

AN ENTIRELY NEW KIND OF POPULATION HEALTH PORTAL

Healthcare for your workforce is becoming **increasingly complicated and expensive**. At the same time, it's becoming more and more challenging for your employees to maintain a healthy and productive lifestyle. **That's why we, your local provider, are introducing OneCommunity.**

OneCommunity is a total population health portal unlike any other. Linked to a unique and innovative set of resources and tools, OneCommunity will help progressive employers:

❯ Transform employee healthcare from a distraction into **a genuine business advantage**

❯ **Gain a competitive edge** with practical, actionable ideas and programs

❯ **Lower health insurance costs** while building a healthier, more productive workforce

❯ **Make it easy and engaging for employees** to get important healthcare information and guidance, so they'll stick with their programs and live healthier, happier, more productive lives

❯ **Save time and increase efficiency** by automating a number of administrative functions that are currently being done manually

Better Health. Better Care. Better Business.

OneCommunity identifies potential healthcare risks before they become critical, and then provides practical, easily-implementable initiatives for tackling them. It even includes a software tool for measuring ROI.

WHAT MAKES **ONE**COMMUNITY *DIFFERENT?*

It's a custom fit for every company, no cookie-cutters here. OneCommunity lets decision-makers easily understand the options available - incentives, surveys, screenings, interventions, seminars, etc. - and create an easy-to-implement program.

It's right here, right now. Most competitors are dependent on remote resources. OneCommunity works with us, your local healthcare provider. We have a genuine understanding of our community and are here to assist you every step of the way.

Your employees will like it. OneCommunity provides a positive, secure experience that employees will enjoy using at home, at work and even on mobile devices. They'll be far more likely to stick with their programs and achieve positive results.

It provides real results. OneCommunity delivers far more than data. You'll see readily implementable solutions that will create real behavioral change, leading to a healthier, more productive workforce.

It saves time and increases efficiency. OneCommunity will automate a number of administrative functions that are currently being done manually, so every dollar invested in a workforce health initiative works even harder.
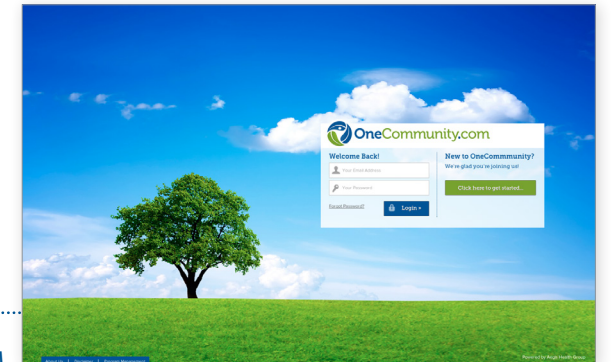

In short, OneCommunity keeps you in front of what's ahead. OneCommunity delivers immediate and ongoing cost savings by helping you anticipate health risks for the long-term, while providing immediate benefits in the near-term.

Here's an up-close look at OneCommunity's features:

REGISTRATION AND WELCOME

OneCommunity.com registration is a *simple, secure process* for your employees. By visiting **www.onecommunity.com** and entering a valid email address and password, participants will be registered and directed to the Welcome page for directions on next steps, based on your program.

PERSONAL HEALTH PROFILE™ AND ONLINE EVENT SCHEDULING

The online Personal Health Profile™ is customizable based on your needs. It includes participant access to an automated scheduling component for events such as screenings or health seminars.

HEALTH SCORING

A health score is generated for each participant who completes the Personal Health Profile and biometric screenings and can be tracked over time to show health improvement. OneCommunity allows for use of its standard scoring system or offers a customized formula. While not a diagnosis of health, the default health score provides an overall context for comparison within the workforce, market, and national averages.

My Health Score

86

Minimal Risk

MY PERSONAL HEALTH REPORT™

A customized health risk report that informs participants of their personal health risks and details how they can achieve better health through specific lifestyle changes. This report can also be purchased as a printed booklet.

MY HEALTH TOOLS™

Includes a comprehensive set of health trackers, current health articles specific to the health risks of the OneCommunity participant, as well as relevant links to support each participant's health goals by connecting them directly with our service lines and health resources.
